TECHNOLOGY OUTSOURCING SERVICES

consulting • technology • outsourcing

BUSINESS INNOVATION

GigaVoice provide one-stop, end-to-end services to support the entire technology life-cycle for your organization: **Plan - Build - Optimize**

Our '**Plan - Build - Optimize**' approach ensures that you enjoy:

- Innovative solutions
- Integrated strategies
- Speed to market
- Smooth and effective operations

GigaVoice's three main service lines are:

Consulting Services (PLAN)

GigaVoice Consulting Services are infused with thought leadership, best practices, and real industry experience. We have the ability to synchronize and fuse your business strategies with appropriate technologies; this is what makes us your ideal partner. We'll help you capitalize on the rapidly changing landscape of business opportunities and technological advances.

Telecom & Web Services (BUILD)

Our specialized and experienced technology professionals deliver telecom and web services based on proven methodologies, practices, processes, and tools. We deliver value to our clients with exceptional project and risk management capabilities, as well as timely delivery of quality and price-effective solutions.

Outsourcing & Smart Sourcing (OPTIMIZE)

GigaVoice offers a comprehensive suite of management services for IT development. We free you to focus on your core business because you know you can depend on GigaVoice. We ensure that your IT systems grow with your business, and we can take care of both the technological complexities and the mundane day-to-day operations.

A BUSINESS SHOULD FOCUS ON WHAT IT DOES BEST

Cost and process efficiencies can make or break the bottom line.

Off shoring or near shoring helps you rapidly and strategically deploy teams to meet your IT needs.

Manage as much or as little as you like. Weekly, daily or hourly reports are up to you.

Great teams are made of great people. Quality, motivation, and engagement are guaranteed.

Plan, build, and optimize your IT infrastructure with us so that you can get to business.

WE CALL IT ‘SMART SOURCING’

GigaVoice can plan, build, and optimize your IT services and infrastructure across key business needs. Keep the management on your end. We can get the developers who work with you remotely.

Offshore IT

Send part or all of the function of your IT department to us. We'll manage it from here.

Nearshore IT

Benefit from our proximity to Israel. We can work onsite or offsite. You can come to us or we can come to you.

Team augmentation

Find developers when you need them. We recruit temporary or permanent staff.

CURRENT AND PREVIOUS CLIENTS

ISO CERTIFIED SERVICES TO GROW YOUR BUSINESS

As an ISO-certified IT company, all internal company processes are designed for efficiency and quality excellence. We guarantee timely delivery and high quality standards. We set and reach milestones and then evaluate what we can do better next time. Partnering with GigaVoice ensures you cost-effective, straight forward solutions for telecom and high-tech development requirements.

We provide IB with custom application and website development on multiple projects. A model off shoring case, we work with IB to seamlessly fit into an existing project management system. Projects are monitored directly by IB, with weekly, daily, or hourly reports as needed. Round-the-clock support and flexibility allow IB to take advantage of a world class infrastructure and team.

The Business Impact:

- Application, Android, and Web Development
- Online, Offsite Management
- Reduced operational costs

Near shoring allows us real-time communication with our client. Programmers use Skype almost hourly to dialogue with team leads in Europe. But the most noteworthy aspect of this project is the use of automated unit tests and automated selenium tests to measure and screen our code.

The Business Impact:

- Quality Assurance
- Real Time Project Management
- Cost Effective Web Applications

Planning and executing an entire strategic overhaul can be daunting. With GAUK, our senior strategists provided direction and consulting for SEO, IT infrastructure, and code optimization. The result? A rapid and strategic optimization of an e-commerce site.

The Business Impact:

- Consulting, Strategic Planning, and Integration
- Managed Infrastructure and Development
- An increased bottom line

Let's talk about...

- ✓ Data mining
- ✓ Data modeling
- ✓ IT infrastructure
- ✓ Mobile development
- ✓ Search engine optimization
- ✓ Semantic search
- ✓ Software architecture
- ✓ Telecom
- ✓ ROI and bottom line

WHY GIGAVOICE?

GigaVoice is uniquely positioned to help organizations create cost-effective and exceptional IT products that operate at high performance. We offer what other outsourcing providers can't: Deep skills and experience.

With more than 10 years of development experience in web and telecom applications, we have access to some of the most talented IT professionals in the world. Our rigorous recruiting and training processes ensure that our people have the customer focus and the technical acumen needed to deliver high performance.

Delivery assurance.

GigaVoice offers IT services wherever and whenever they are needed. But we always pay attention to delivery times. With an eye to deadlines, we deliver on time, every time.

Quality assurance.

With an ISO-certified approach to service delivery, we apply proven and reusable tools, methods, and processes to ensure that our work is carried out consistently.

Flexibility.

We offer customizable solutions. We will take care of as much or as little of the workload as you wish, leaving you and your staff free to focus on what you do best... your core business.

Customer service.

We react quickly to your needs. Additionally, GigaVoice provides you with an account manager whose wealth of international IT experience is matched with knowledge of the local scene and IT talent. This "know-how" enables managers to integrate team members quickly and immediately contribute to your business projects.

A business focus.

GigaVoice collaborates with clients to help them become high-performance businesses. We work closely with our clients to deliver IT services that align with their unique business objectives, boost business agility, and enable an environment of innovation and continuous improvement.

About GigaVoice
